- Data cleaning, ETL workflows, business intelligence, statistical analysis

Projects

Operations Profitability & Cost Optimization | SQL, Python, Tableau, PostgreSQL | 2026

GitHub: github.com/juliocezarcarneiro/operations-profitability-cost-optimization

- Built an end to end analytics project analyzing operational profitability, cost drivers, and KPI performance across locations and product categories
- Developed SQL workflows for data validation, profitability analysis, cost trend analysis, and operational reporting using PostgreSQL
- Created executive style Tableau dashboards to visualize revenue, gross margin, waste cost, and operational performance metrics
- Performed data cleaning and transformation using Python and pandas to support dashboard reporting and business insights

CFO Executive Dashboard | Python, Tableau, Data Visualization | 2026

GitHub: github.com/juliocezarcarneiro/cfo-executive-dashboard-techflow

- Designed an executive dashboard focused on financial performance, budget variance, and cash flow analysis
- Developed visual KPI reporting to support financial monitoring and business decision making
- Created professional data visualizations and executive style reporting layouts for stakeholder presentation

Professional Experience

Kitchen Manager, iQ Food Co. | Toronto, ON | Feb 2019 - Aug 2024

- Analyzed sales, inventory, and waste data using Excel, PivotTables, and operational reporting tools to support cost control and forecasting
- Reduced food waste from 8 percent to 2 percent through inventory monitoring and operational process improvements
- Maintained food costs between 28 percent and 32 percent through weekly forecasting, purchasing coordination, and inventory management
- Managed daily operations, workflow coordination, and team scheduling in a high volume environment

Business Consultant | Gestione Small Business Management | Brazil | Aug 2015 - Nov 2018

- Built KPI dashboards and operational reports to support inventory management and business decision making
- Reduced stock outs by 25 percent and excess inventory by 15 percent through pricing, demand, and cost analysis
- Supported small business process optimization initiatives focused on operational efficiency and performance tracking

Volunteer Experience

Data Analyst Volunteer

Federation of Canadian-Brazilian Businesses | Toronto, ON | Jan 2025 - Present

- Perform data cleaning, EDA, and reporting for business and operational analysis projects
- Use Python, pandas, SQL, and Tableau to build dashboards, validate datasets, and support reporting workflows
- Generate charts, analytical reports, and executive PDFs for investment and market insights
- Document reporting processes and analytics workflows for organizational decision making
